BATTLEGROUND VIRTUAL CRO

BG

Be ready for tomorrow, today.

A software driven consultancy.
Integrate & streamline all your risk & resilience needs. Battleground's resilience-first GRC system transforms risk & compliance by embedding operational resilience at its core.

Response & Recovery Planning
Prepare for disruption & mobilise teams.

IT Applications
Define tolerances, connect to risks, assess controls, generate insight.

Service Provider Management
Understand & mange third parties to support business objectives.

Touchbase Messaging
Easy to use mass messaging, controlled templates & simple tracking of responses.

Simulations
Simulate & build response capability in a safe environment.

Questionnaires
Capture & analyse feedback from a wide range of people quickly.

Messenger
Chat to teams in real time during planning & incidents.

Processes & Business Impact Analysis
Identify & connect key business processes with underlying enablers & tolerances

Risk
Identify, assess, & manage risks by revealing key enablers & connections, aligned with Risk Appetite.

Control
Define, assess & understand the impacts across your business of controls to drive improvement.

Assurance
Commonsense & value add assurance that provides insight on objectives.

Incident
Manage & respond to risk & resilience incidents, then learn & improve.

Action Plans
Visibility of all your improvement actions & the impact on your risk profile

Compliance
Practical insight into your compliance position, informed by data.

Policy Management
Manage your policies & frameworks, show linkage & gain meaningful insights.

Supported by powerful, in platform pivot reporting & RAiDAR, in-built AI that reduces data entry & enables you to focus on what really matters.

battlegroundgroup.com

Battleground can support you at any stage of your risk and resilience maturity.

We know that it is important to crawl, before you walk, before you run. This philosophy, which informs our consultancy work, also forms the foundation for our work with clients who adopt Battleground Live.

CRAWL
- Build BIA
- Print BCPs
- Develop risk & control profile
- Develop action plans

WALK
- Online & in-app response & recovery planning
- Control assurance
- Risk Appetite

RUN
- Incident Management
- Service provider management
- Emergency notifications
- Risk scenario analysis

Risk Intelligence. Re-thought.
