

Is your software strengthening your resilience?

Risk & resilience award-winning software for today's leading organisations.

Be crisis ready

Purpose built software.

Utilised daily globally. Supported locally.

Scalable solutions for your organisation

The next crucial step in your business resilience lifecycle. Resilience software to centrally manage your BIAs, risks, controls, incidents and planning, in real time.

Battleground Live Mobile App

- Instantly report incidents with a single click for rapid response.
- Access all incident response features and updates on your mobile.
- View response plans and company contacts in real time.
- Manage incidents and complete tasks from any location.
- Initiate video calls, and use secure two-way messaging.

Business Impact Analysis (BIA)

- Wizard-based BIA in 6 guided steps
- Capture business processes, critical operations, and dependencies.
- Link IT applications and document manual workarounds.
- Build your BCP team and generate a Word report in one step.
- Use built-in pivot reporting for real-time data insights.

Response Planning

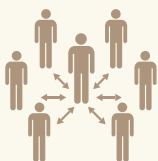

- Build any type of response and resilience plan online.
- View your Plan on the Battleground mobile app.
- Checklist based planning.
- Personalised to Roles and individuals.
- Centrally managed and up to date in real time on the mobile.

Policy Manager

- Centrally manage all policies, procedures, and frameworks.
- Analyse documents with RAiDAR AI against relevant standards.
- Map policies to regulatory standards, frameworks, and objectives.
- Receive automated notifications when policies are due for renewal.
- Ensure secure storage and easy retrieval of all policy documents.

Battleground Live software is a revolutionary technology that allows your teams to efficiently manage any incident on the go.

Incident Management

- Reach your team instantly through push notifications, SMS and email.
- Initiate and manage incidents from the mobile app or web portal.
- Manage incident teams, messaging, tasks and logs.
- Bring plans to life, completing tasks during an incident on your phone.
- Capture all actions in a central non-editable log online.

Questionnaires

- Build forms, surveys, post-incident reviews and other questionnaires.
- Share your creation with anyone and/or link them to an incident.
- Instantly view results in formats tailored to your organisation.
- Access and manage via the web platform and mobile app.
- Streamline feedback and reporting for continuous improvement.

Simulations

- A closed secure environment with no material leakage.
- Build simulations and exercises that are reusable and scalable.
- Join a workshop from any web-enabled device, anywhere.
- Interact with a workshop and view newspaper articles and emails.
- Explore SMS messages, social feeds, and more

Touchbase (Two-Way Emergency Notifications)

- Send two-way messages to your people.
- Choose between SMS, Push Messages and Email, or all three.
- Send to as many people as you need based on data-driven filters.
- View results in real-time in an easy to use dashboard.
- Manage via the web or mobile app.

Supported by powerful, in platform pivot reporting and RAiDAR, in-built AI that reduces data entry and enables you to focus on what really matters.

Risk

- Define, manage and assess your risks with optional RAiDAR AI support.
- Link risks to organisational data, such as class, level, providers and more.
- Develop plans with RAiDAR AI support and connect risks to controls.
- Configurable matrix to assess risks and measure control effectiveness.
- Evaluate risk acceptability and define action plans if needed.

Control

- Create a control with the optional support from RAiDAR AI.
- Connect controls to processes, risks, apps, providers, and accountability.
- Prioritise and define assurance requirements for a control.
- Connect a control to an action plan to address the control.
- Evaluate the effectiveness of a control on design and operational basis.

Action Plan

- Create a plan, define its description and required delivery timeline.
- Link action plans to risks, controls, incidents, and compliance data.
- Understand the delivery mode and costs of an action plan.
- Track action plan delivery, including status, RAG, and commentary.
- Close action plans with supporting data and performance review.

Certified 100% Carbon Neutral
